# A BIT OF HISTORY

## A FORMER FARM WITH A NEW OUTLOOK

Nestled on the summit of **Mont Cindre**, just ten kilometers from the center of Lyon, you'll find a **new and unique place for living** that rounds out the **èhôtels-Lyon** offer of hotel, event and restaurant facilities at the site.

In the midst of a **four-hectare natural estate** with breathtaking views, an **old farm, along with its barns and stables**, has been transformed into an exceptional venue known as **Les Lanternes**.

An **old farm** composed of two sets of buildings located on a four-hectare **natural estate**.

Meet in La Longue Vue, a **redesigned barn**. Sleep at **La Ferme** or in the **former stables**. Each bedroom features an **engraving** of local **plants**. The heated swimming pool was built in a **caborne**, a former shepherd's hut made in gold-toned stones from the Monts d'Or range.

Yesterday, the slopes of Mont Cindre were covered with **grapevines**. Today, the vines have been replaced with villas and their swimming pools. In the past, people from Lyon came here to **breathe in the pure air** and **keep cool in summer**. And they continue to come in ever larger numbers.

There used to be as many as **six café-restaurants** on Mont Cindre. Now, there are only two: "**La Haut sur la Colline**" and "**L'Ermitage Hôtel Cuisine-à-manger**".

# CONCEPT & STYLE

## MINIMALISM AND ELEGANCE...

The past history of Les Lanternes, an old farm, was a **source of inspiration** for interior decoration. The stillness of the countryside encourages **resting well**, with the sounds of nature and the light of dawn to greet the day. Decoration is restrained, elegant and designed to **relax the mind** and ensure a good rest.

## ... JAPANESE INSPIRATION

Each room features a **plant engraving** that recalls **ikebana**, the traditional Japanese art of floral arrangement. In keeping with this art, the room numbers represent **vases**. The plants chosen are all from the local area.

*With a knowing nod to the setting, the heated indoor swimming pool has the shape of a "caborne". This type of dry stone hut was found formerly throughout the Monts d'Or landscape.*
